

EDU-202: Networking Specialist

The **EDU-202: Networking Specialist** course is **12 hours of instructor-led training that will help you:**

- Install Ordr Sensors, bind them to an SCE, and launch discovery
- Integrate solution components as part of your technology stack
- Configure OSIC and flow monitoring in the network
- Troubleshoot common network issues

Course Modules

- 0:** Introductions
- 1:** Solution Architecture
- 2:** Sensor Config and Discovery
- 3:** Service Configuration
- 4:** Common Integrations
- 5:** OSIC
- 6:** Flow Analytics
- 7:** Network Troubleshooting

Scope

- **Type:** Instructor-Led Training
- **Level:** Intermediate
- **Duration:** 12 Hours (2 days)
- **Class Size:** Max. 10 Learners
- **Format:** Lecture and Hands-On Labs
- **Revision:** OrdrAI Protect 9.0.1

Objectives

Designed for the specific needs of Network Managers and the NOC Team, this 12-hour course will teach learners to use Ordr to establish and analyze connectivity in their production environment including device groupings, flow monitoring, the Ordr Software Inventory Collector, and troubleshooting methodologies. The Ordr UI components specific to testing connectivity and monitoring traffic patterns are featured in this track.

Target Audience

All entry-level to intermediate users of the OrdrAI Protect solution responsible for network management, network engineering, or network administration.

Prerequisites

This course builds on the content of Ordr's EDU-101: Foundations and as such completion of the online or instructor-led version of the Foundations course is highly recommended. Learners must also have a baseline understanding of how modern TCP/IP communication networks function.

Ordr Education Services

Courses from Ordr deliver the foundation of knowledge and expertise necessary to effectively manage the Ordr-enabled environment and ensure your connected assets are secure. Our accreditation and certification options establish a benchmark for personnel, providing additional assurance that they are prepared to operate and manage utilizing the added visibility provided by the OrdrAI Protect UI.
